

# Cutting-Edge Snowflakes!

Here are two templates which you can cut out easily to make beautiful snowflakes. All you need to do is print out this page on your computer using a piece of foldable paper (white or colored) and then follow the instructions below. Use small sewing or cuticle scissors with a curved blade for the best result. And make sure that any children using scissors are supervised by an adult.

**STEP 1:** Choose one template and cut out the square by carefully cutting along the square's side so it reflects the drawing in Figure 1.

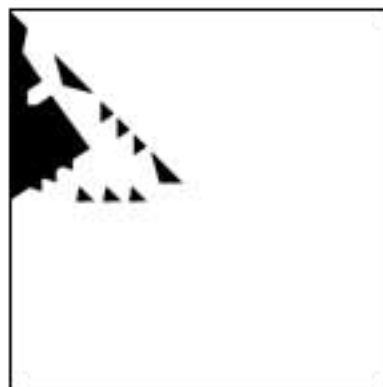

Fig. 1

**STEP 2:** Fold the paper in half so it reflects the drawing in Figure 2.

Fig. 2

**STEP 3:** Fold the paper again in half so it reflects the drawing in Figure 3.

Fig. 3

**STEP 4:** Fold the paper into a triangle so the blackened design is facing forward (Figure 4). Then cut out all the blackened areas. Unfold the piece of paper and behold your beautiful snowflake!

Fig. 4

**STEP 5:** Decorate the snowflake with colored markers or use glitter glue around the edges.
